As I was walking up the stair
I met a man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

When I came home last night at three
The man was waiting there for me
But when I looked around the hall
I couldn't see him there at all!
Go away, go away, don't you come back any more!
Go away, go away, and please don't slam the door

Last night I saw upon the stair
A little man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

CHECKLIST OF COGNITIVE DISTORTIONS

1.	**All or nothing thinking** You look at things in absolute, black-and-white categories
2.	**Overgeneralization:** You view a negative event as a never-ending pattern of defeat
3	**Mental Filter:** You dwell on the negatives and ignore the positives
4	**Discounting the positives** You insist that your accomplishments or positive qualities "don't count"
5	**Jumping to conclusions:** (A) Mind reading – you assume that people are reacting negatively to you when there's no definite evidence for this; (B) Fortune Telling – you arbitrarily predict things will turn out badly
6.	**Magnification or Minimization:** You blow things way out of proportion or you shrink their importance inappropriately
7	**Emotional Reasoning:** You reason from how you feel "I feel like an idiot, so I really must be one." Or "I don't feel like doing this so I'll put it off."
8.	**Should Statements".** You criticize yourself or other people with "Shoulds" or Shouldn'ts." "Musts," "Oughts" "Have tos" are similar offenders.
9	**Labeling:** You identify with your shortcomings. Instead of saying, "I made a mistake," you tell yourself "I'm a jerk," or "a fool," or "a loser."
0	**Personalization and Blame:** You blame yourself for something you weren't entirely responsible for or you blame other people and overlook ways that your own attitudes and behavior might contribute to a problem.

Reklamy przyjmujemy pod numerem tel.: (973) 777-4443 e-mail abecadlo@cs.com Fax (973) 777-4405

Cena reklamy zależy od jej powierzchni (tj. liczby jednostek) i od długości zamówienia (im, tj. czy reklama ma się ukazać)

Jednostka – prostokąt kolumny (2,5 cala) x wysokość 1 cal

Ceny za jednostkę reklamy:

1 tydzień	**$13**
2 tygodnie	**$11**
4 tygodnie	**$ 9**

Standardowa reklama trwa 4 tygodnie.
Reklama rzadziej niż co najmniej 2 jednostki, więc koszt najmniejszej reklamy na 4 tygodnie wynosi.

$9 x 2 jednostki x 4 razy = $72

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I d like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here s how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll free number in the United States) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number Within a minute, your fax should appear on the site Click the thumbnail to see a large version

To test the receive functionality of your fax machine, point your web browser to FaxZero this site lets you send faxes for free to anywhere in the United States and Canada Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

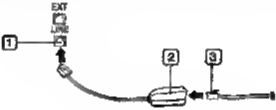
Basic faxing

- For special faxing features, refer to the Advanced Guide (See Fax features).
- Accessing menus may differ from model to model (see Accessing the menu or Control panel overview).
- M267xN/M287xND/M287xDW does not support fax features.
- You cannot use this machine as a fax via the Internet phone. For more information ask your Internet service provider.
- We recommend using traditional analog phone services (PSTN: Public Switched Telephone Network) when connecting telephone lines to use a fax machine. If you use other Internet services (DSL, ISDN, VoIP), you can improve the connection quality by using the Micro-filter. The Micro-filter eliminates unnecessary noise signals and improves connection quality or Internet quality. Since the DSL Micro-filter is not provided with the machine, contact your Internet service provider for use an DSL Micro-filter.



1. Line port
2. Micro filter
3. DSL modem / Telephone line

(see Rear view).

Preparing to fax

Before you send or receive a fax, you need to connect the supplied line cord to your telephone wall jack (see Rear view). Refer to the Quick Installation Guide how to make a connection. The method of making a telephone connection is different from one country to another.

Sending a fax

When you place the originals, you can use either the document feeder or the scanner glass. If the originals are placed on both the document feeder and the scanner glass, the machine will read the originals on the document feeder first, which has higher priority in scanning.

1. Place a single document face down on the document glass, or load the documents face up into

USING ZOIPER BIZ FOR WINDOWS FOR SENDING FAXES

The Zoiper Print to Fax Driver works on
Windows 2000 Windows XP 32bit and Windows Vista32bit

During the installation of Zoiper the Printer Driver is being installed automatically

When using Zoiper Biz on Windows 32bit you can send almost any document by using the Zoiper Printer driver

Just open the document, open the printing dialogue and choose the
"Zoipper Print to Fax" virtual device
This will open your Zoiper and send the file as a fax message

When using Windows 64bit you have to convert the file to a TIFF file then you will be able to send it as a FAX message by using Zoiper

There are many tools for converting one type to another

The guidelines for the TIFF files are
200 dp R6 (which is A4 and Letter combined so either A4 or Letter is fine) portrait orientation 1 bit per pixel

We do support multi-page TIFF files and arbitrary resolutions and pixel depths

Colour pages are automatically desaturated by luminence (standard YCrCb conversion) then dithered using Floyd-Stanberg to 1 bit per pixel
This has good effect and detail retaining for photos and pictures

If a page is not in the 195-205 dpi resolution range it will be scaled automatically using Lanczos Sinc resampling to 200 dpi while retaining aspect.
If the page size does not match R6 it will be cut where it is longer and white will be added where it is shorter
No scaling is used here

Most of the TIFF image compressions are supported including JPEG-in TIFF (but standalone JPEG files are not supported)

When not applicable like the case with Windows Vista 64bit, there are many tools available outside Zoiper that can add that functionality

Re: Immigrant Petition Filed by Eduard NORINSKIY on behalf of Kristina NORINSKA

I was a permanent resident of the United States of America, having been born August 2, 1972

I submit this Affidavit in support of the Immigrant Petition filed by Eduard Norinskiy on behalf of Kristina Norinska.

I currently reside at 1903 Ocean Avenue, Apt. 7F, Brooklyn, New York 11230

We meet at talk on the regular basis. I know that Eduard has a daughter in Odessa, Ukraine, named Kristina Norinska. Eduard talks a lot about his daughter. He is proud of her academic achievements and is waiting to re-unite with her in the United States.

Eduard is supporting Kristina emotionally in her academic milestones and provides her with financial support.

When I was traveling to Odessa, Ukraine on Eduard asked me to meet with Kristina and gave me some gifts and $500.00 to give to her to help her in covering her expenses. I met with Kristina in Odessa and gave her everything.

This information is accurate and provided to the best of my knowledge.

The Shepherd

A Shepherd was herding his flock in a remote pasture when suddenly a brand new BMW advanced out of the dust cloud towards him.

The driver, a young man in a Brioni suit, Gucci shoes, Ray Ban sunglasses and YSL tie, leaned out the window and asked the shepherd, "If I tell you exactly how many sheep you have in your flock, will you give me one?"

The shepherd looked at the man, obviously a yuppie, then looked at his peacefully-grazing flock and calmly answered, 'Sure.'

The yuppie parked his car, whipped out his lap top and connected it to a cell phone, then he surfed to a NASA page on the internet where he called up a GPS satellite navigation system, scanned the area, and then opened up a database and an Excel spreadsheet with complex formulas. He sent an e-mail on his Blackberry and, after a few minutes, received a response.

Finally, he prints out a 150 page report on his hi-tech, miniaturized printer then turns to the Shepherd and says, "You have exactly 1,586 sheep."

"That is correct, take one of the sheep," says the shepherd, and watches the young man select one of the animals and bundle it into his car.

Then the Shepherd says: "If I can tell you exactly what your business is, will you give me back my sheep?"

"OK, why not " answered the young man.

"Clearly, you are a consultant," says the shepherd.

"That's correct," says the yuppie, "but how did you guess that?"

"No guessing required," answers the shepherd. "You turned up here although nobody called you. You want to get paid for an answer I already knew, to a question I never asked, and you don't know crap about my business."

"Now give me back my dog "

Testing Your HP Fax Machine with the HP Fax Test Service

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service.

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTE:

Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing ***82** before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE

Whenever troubleshooting a fax issue, it is good practice to set the ***Automatic Reports*** option to **Every Error** before attempting a test fax. This way, even if the sent fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in different places on different products, consult the product *User's Guide* for specific steps.

Roly, here is the formula for calculating kWh.

(watts/1000) x hours on = kWh

So a 1500 watt heater would use 1.5 kWh if on for one hour:

(1500/1000) x 1 = 1 5

A kWh costs about 15 5 cents, so 1 5 kWh x $0 155 per kWh = $0 23 This would be the cost per hour to operate a 1500 watt space heater.

Please note that while a lower wattage heater costs less to operate, it also provides less heat.

Sincerely,

John Hastings

Templates and examples can be retrieved through Web browsers like Netscape and Internet Explorer by looking to disk. See your local documentation for details of how to do this.

Template documents for the recommended word processing software are available from the IACoW Webs in and must for LaTeX2ε and Microsoft Word (Mac and PC) for US letter and A4 paper sizes.

Authors are required to use templates for the correct paper size and are asked to use the template corresponding to the correct version of Word. Do not transport Microsoft Word documents across platforms, e.g. Mac ↔ PC.

Please see the help files for instructions on how to install templates in your Microsoft templates folder.

CHECKLIST FOR ELECTRONIC PUBLICATION

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one page fax to 1-855-330-4239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

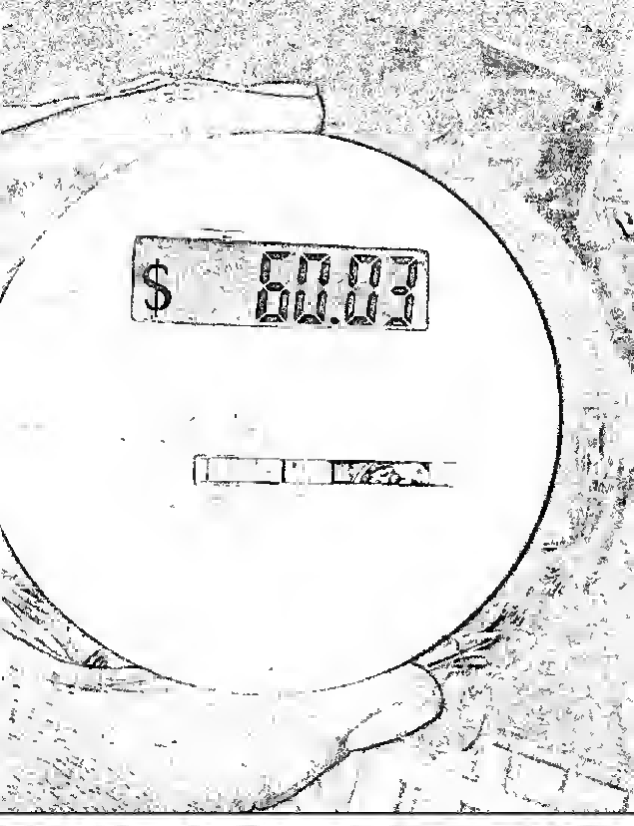
GENERAL MAINTENANCE
Miami PC Wiz, Inc.



$ 60.03

1.0 Applicability

This practice applies to all Encana Oil & Gas (USA) Inc. (Encana) staff and service providers who work under contract for Encana at all facilities owned or operated by Encana.

2.0 Scope

2.1 Purpose

The purpose of this practice is to establish the minimum operational requirements for temporary pipe installation procedures and management practices for the Business Units (BUs) and sub-Business Units (SBUs) at Encana. Based on site-specific conditions, an SBU may elect to develop more comprehensive operational procedures in order to further reduce hazards and risks associated with a work locat on.

2.2 Background

Temporary pipework is a functional description of equipment also known as flow control equipment, treating iron or "CHIKSAN" flowlines. In a large number of applications the connection of this equipment is made with hammer lug or WECO unions which can be integral, welded (but not back-welded) or threaded. There is no single standard or organization, such as API, NORSOK or IADC, which has set the requirements for the design, manufacture and installation of temporary pipework used for operations on wells. Although the same nominal temporary pipework connect ons from different suppliers are dimensionally compatible and can therefore be connected, the design standards of the pipe body on which the unions are forged or welded, can be, and often are, different.

2.3 Temporary Pipe Installation Checklist

This checklist summarizes the steps in the design and installation of temporary piping installat ons on a site.

☐	Step	Activity
☐	1	Determine the appl cable codes to be adhe ed to in design of temporary p pe and hoses. See section 3.1-3.4. Consider whether it is standard or sour service. This practice is for the operations covered in section 2.4. Permanent facility installations are covered under Encana's Specification for Piping and Valves.

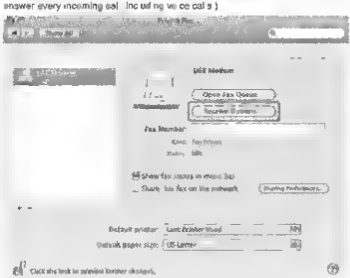
5 You will be returned to the main **Print & Scan** (or **Print & Fax**) preferences window. Ensure the **USB Modem** is selected. If you will be receiving faxes: Click **Receive Options** on the right pane. Select 'Receive faxes on this computer', specify the number of rings you wish to answer after, and then click **OK**. (Note that when receive mode is enabled, the modem will answer every incoming call, including voice calls.)



Your modem is now set up to send or receive faxes. For more information about sending or receiving faxes, please refer to fax help topics in Mac OS X's Help. Click the **Help** menu at the top of the screen and search for "faxing" (without quotes).

Dear Dr. Sauer

We are pleased to inform you that you have been selected by a vote of your peers to be included in the 2018 database of *topDentists* ™. The listings for the San Diego area appear online at www.usatopdentists.com and will appear in the April issue of ***San DIego Magazine***

Because *topDentists* is based on an exhaustive peer-review survey in which dentists and specialists throughout San Diego county cast "votes" on the abilities of other dentists and specialists, and because listings cannot be purchased (and no payment is required to be listed), inclusion in *topDentists* is considered a singular honor

With over sixty years in combined experience compiling peer-review professional referral guides, we have been able to use our experience along with the input of dentists across the United States to create a methodology that has been refined and improved over previous superlative guides

Congratulations on being honored by your peers.

Sincerely

Mark Barkley

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one page fax to 1 855 330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Preparation

A thorough inspection of the premises and structures of is the first step towards determining the scope of infestation and

[illegible] conducive to spider activity. Spider specimens should be taken and identified to determine whether or not a threat to occupants' health and well being exists.

Cultural Control

Those responsible for landscape management should prune trees and bushes back away from structural surfaces to [illegible] spiders and other pests from hiding into buildings. Likewise, all vegetation, such as flowers, ground cover, ivy, turf grass and weeds, should be cut down and removed from along the foundation perimeter, porches and other areas of buildings. Stacks of firewood and other materials should be relocated away from buildings. Outdoor lighting or structures should be converted from white incandescent and mercury vapor lamps (attractive to insects – or day flood to yellow/amber incandescent and sodium vapor lamps (less attractive to nocturnal flying insects, thereby reducing prey for spiders

EXPLANATION OF THE ITEMS ON THE NOTICE

Liability Information

888-887-1655

TOTAL MAXIMUM - The maximum amount of regular benefits potentially payable to the employee. The amount shown is the maximum amount that may be charged to your account. In some situations, such as voluntarily quitting or a discharge for misconduct, benefits are charged to the balancing account or the administrative account and not to your UI reserve account. You will receive or may have already received an initial determination if these situations apply. If $0.00 appears, benefits will not be charged to you. See WEEKLY MAXIMUM below.

WEEKLY MAXIMUM - The amount shown is the weekly maximum that could be charged to your account. If the employee had other employers in the base period, the amount shown is your proportional share of each week paid. The proportion potentially chargeable to you is based on the percentage of base period wages paid by you in relation to base period wages paid by all other employers. If $0.00 appears, your proportional share of base period wages is less than 5% and therefore benefits will not be charged to you.

LIABLE UNTIL - The ending of the employee's benefit year. Benefits based on this computation may not be carried over to a later benefit year.

Quarterly Gross Wages.

The four calendar quarters are:

Quarter 1	January 1 through March 31
Quarter 2	April 1 through June 30
Quarter 3	July 1 through September 30
Quarter 4	October 1 through December 31

The four calendar quarters shown make up the employee's base period. The base period is controlled by the date the claim was filed and by the date the employee became unemployed. For claims effective July 2, 2006 or later, claimants who do not qualify using the standard base period (the first four of the last five completed calendar quarters) may establish a claim using an alternate base period (the four most recently completed calendar quarters).

The gross wages paid by you during the quarter are shown. If wages are incorrect, contact the UI office immediately. The UI office is indicated below the social security number.

ELIGIBILITY PENDING - "Yes" in this column indicates there is an eligibility issue pending on this claim. The issue will be investigated and an initial determination mailed to you when the investigation is complete.

Our Father, which art in heaven,
hallowed be thy name;
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,
but deliver us from evil
[For thine is the kingdom,
the power, and the glory,
for ever and ever]
Amen

Subject: Demo design

Good Morning, ...

I have worked up a new design. I would like you to review it and let me know if you need to do to finalize it.... I am not sure about the font. would a more font be better? You know what, you are doing ---- I am just trying to see something in my mind.

the word "Brand" should be larger than I have it. I think???

As to the shirts. I have them and need to get them to team in the Fitch thing (will anyone be there today?).....I should have 100 adult and 30 youth. We were thinking of a nice rich brown to match on the Nature colored t-shirts....

Let me know your thoughts...
Thanks....joyce

ps Val is the name of the cowboy doing our handpiece. He will be on our website... www.dancingirl.org
Do you think there is an appropriate place to put his name "Val" on the design. you can see how the words it on our website. ....

HI Donald

Please try sending outbound faxes from a specific MFD to faxtoy.net (1 888 877 1655) then send the same page to one of the affected MFD's. We need to check if inbound, outbound, or all fax functions are impacted.

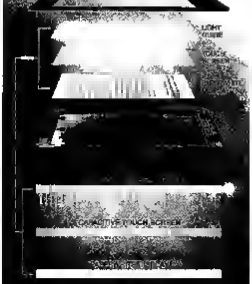
Read in Bright Sunlight with No Glare

Kindle Paperwhite has a matte screen that reflects light like ordinary paper so you can read as easily in bright sunlight as in your living room with no glare.

Read at Night

With Kindle Paperwhite, reading in bed just got better. The patented built-in light illuminates the screen, not the entire room, so you won't disturb your partner when you can't put your book down at night.

Patented Built-in Light



Patented built-in light

Designed for Reading

Unlike a backlit tablet display, Kindle Paperwhite guides light towards the surface o ink display from above so that the light never shines directly towards your eyes, t you to read comfortably without eye strain. The built-in light illuminates the scree evenly than a book light or high ad cover.

Perfectly Balanced Whiteness

We worked on Kindle Paperwhite for over two years to perfect the uniformity of t in light, flattening out a flow optic cubic into a sheet and nanoimprinting to ensu perfectly even distribution of light. Our design uses nanoscale indents effective pi to enable light control over the direction of the light. Enjoy reading with enormo lighting uniformity and evenly balanced whiteness across the entire display. See ho screen looks in different lighting conditions.

Adjustable Brightness

Your eyes adapt to the amount of light around you, so you'll prefer dimmer light reading in a dark setting and brighter light when reading in well-lit surroundings. adjust the brightness of Kindle Paperwhite across a wide spectrum—from low ligh brightness—so you can read comfortably in any setting.

Power Efficient

Because our patented technology enables fine-grain control over where the light i diffused, Kindle Paperwhite uses low-power LEDs requiring very little power to ev illuminate the entire screen.

The NCO Creed

No one is more professional than I. I am a Noncommissioned Officer: a leader of soldiers. As a Noncommissioned Officer, I realize that I am a member of a time honored corps, which is known as "The Backbone of the Army". I am proud of the Corps of Noncommissioned Officers and will at all times conduct myself so as to bring credit upon the Corps, the Military Service and my country regardless of the situation in which I find myself. I will not use my grade or position to obtain pleasure, profit, or personal safety.

Competence is my watchword. My two basic responsibilities will always be uppermost in my mind – accomplishment of my mission and the welfare of my soldiers. I will strive to remain tactically and technically proficient. I am aware of my role as a Noncommissioned Officer. I will fulfill my responsibilities inherent in that role. All soldiers are entitled to outstanding leadership; I will provide that leadership. I know my soldiers and I will always place their needs above my own. I will communicate consistently with my soldiers and never leave them uninformed. I will be fair and impartial when recommending both rewards and punishment.

Officers of my unit will have maximum time to accomplish their duties; they will not have to accomplish mine. I will earn their respect and confidence as well as that of my soldiers. I will be loyal to those with whom I serve; seniors, peers, and subordinates alike. I will exercise initiative by taking appropriate action in the absence of orders. I will not compromise my integrity nor my moral courage. I will not forget, nor will I allow my comrades to forget that we are professionals, Noncommissioned Officers, leaders!

The Army Goes Rolling Along

First to fight for the right,
And to build the Nation's might,
And The Army Goes Rolling Along.
Proud of all we have done,
Fighting till the battle's won,
And the Army Goes Rolling Along.

Then it's Hit! Hit! Hey!
The Army's on its way
Count off the cadence loud and strong (TWO! THREE!)
For where e'er we go,
You will always know
That The Army Goes Rolling Along.

Ordnance Song

Arms for the love of America
They speak in a foreign land, with weapons in every hand.
What ever they try we've got to reply in language that they understand.
Arms for the love of America
And for the love of every mother's son
Who's depending on the work that must be done
By the man, behind the gun, behind the gun

True (?) Medical Embarrassments

1. At the beginning of my shift I placed a stethoscope on an elderly and slightly deaf female patient's anterior chest wall. "Big breaths," I instructed. "Yes, they used to be," replied the patient.

- Submitted by a doctor from Seattle, Washington.

2. One day I had to be the bearer of bad news when I told a wife that her husband had died of a massive myocardial infarct (Note: That's doctor talk for a heart attack.). Not more than five minutes later, I heard her reporting to the rest of the family that he had died of a "massive internal fart."

- Submitted by a doctor from Manitoba, Canada.

A Message from DFAS Retired and Annuitant Pay Director

Hello Everyone –

At Retired Pay, delivering first-class service to our customers is our priority, but at the same time, we must continue using taxpayer dollars wisely. I'm writing to you to help you get prepared for the upcoming tax season and encourage you to use *myPay*.

We have invested a great deal of effort in making a variety of self-service options available to you on *myPay*. These are the quickest and most secure ways for you to access your account information. Please consider using *myPay* to get the tax documents you need at the end of the year. It will be quicker and more secure than making your request by phone or by mail.

Follow this list to get ready for tax season:

2. Access your *myPay* account to make sure your correspondence address and email address are correct and up to date.
3. Know when your 1099R will become available online at *myPay*.
4. Know when your 1099R will arrive in the mail.
5. Know how to get additional copies of the 1099R if it gets misplaced.
6. Know how to contact us if you have any issues that need to be discussed.

We have covered each of these subjects in the articles below. This newsletter also contains news and updates about how to contact Tricare and Delta Dental CRDP/CRSC open season, and the benefits of online banking. You can access further information on all these subjects at our website at http://www.dfas.mil/retiredmilitary.html.

Please accept our best wishes for a happy holiday season and a safe and prosperous new year!

Q.

I'm having trouble sending or receiving faxes. What should I do?
A.

If you cannot send or receive faxes, try these solutions:

- Make sure the recipient's fax machine is turned on and working.
- Make sure paper is loaded correctly in your product.
- Make sure Receive Mode is set to Auto so you can receive faxes automatically.
- Check that the cable connecting your telephone wall jack to your product's LINE port is secure.
- Print a fax connection report using your product control panel or fax software to help diagnose the problem.
- Verify that the telephone wall jack works by connecting a phone to it and testing it.
- If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the Line Type setting to PBX. If you still cannot send a fax, turn off the turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)
- If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
- If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.
- Try lowering your product's fax speed setting.
- Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.

Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Baked Sweet Potato Fries

2 medium-sized sweet potatoes*
2 T extra virgin olive oil
1/2 t cumin
1/2 t oregano
1/2 t coriander
1 t kosher salt
1 t parsley
fresh ground pepper (about 10 turns of a pepper mill)

*you want 1lb sweet potatoes after they are peeled, sliced, etc. If you weigh them at the store make sure you have a little more than a pound to allow for the peeling, and tossing of small pieces

Preheat oven to 425 degrees. Spray a cookie sheet lightly with cooking spray (Do you need to spray it? Probably not. But I feel safer doing it!) Don't use a silpat, or parchment, or anything like that. You want them right on the cookie sheet.

Slice your sweet potatoes into french fry shape and size. I like mine to be 1/4", or maybe a tad bit bigger. Below is a picture of the steps I take to make the most out of the potato. It's pretty self explanatory. Cutting them larger, like steak fries, will sometimes result in a big soggy mess, so stay small to get the best results.

Local unemployment numbers, no signs of recovery

POSTED BY JOHN GRUBER ON DECEMBER 14, 2010 AT 12:08PM | SHARE THIS

What little difference a year makes - especially if the topic is unemployment.

New figures from Washington's Employment Security Department show employment growth both in Pierce County and the state is firmly lodged in neutral.

Those November 2010 statistics are barely different from those of a year ago. In seasonally adjusted numbers, the state's unemployment rate in November of this year, 9.2 percent, is the same as it was in November 2009.

In not-seasonally adjusted figures - the only ones available on a county level - Pierce County's lower playfield rate last month was 9.0 percent, just 1 percent less than the same month last year.

Thurston County showed a small increase in rate at same year from 7.2 percent in November 2010 to 7.5 percent last month. The pattern was the same in King County where the unadjusted employment rate was 6.7 percent last month, .5 percent higher than in the same month a year ago.

Job growth is in a holding pattern, said Employment Security Commissioner Paul Trause in a statement today. It underscores why unemployed workers are having a hard time finding jobs and why we need to extend federal emergency benefits a while longer.

Congress is currently considering an additional extension of these benefits.

"We're experiencing the most rapid and universal recovery we've seen since World War II," said Greg Marks, the state's labor market and economic analysis director.

While all the numbers were listed up for last month, the state saw a net gain of just 100 jobs over October, which nearly made a dent in the ranks of the unemployed in the state where numbers now total 322,700. If you count those who are still actively seeking work. The number not working is significantly higher - those folks may workers who've given up their searches are counted in the total.

The bright spots in the state economy were education and health services, which

QUESTIONS ABOUT COPAYMENT STATUS

WHAT IS A COPAYMENT? The U.S. Department of Veterans Affairs (VA) charges a predetermined rate, or copayment, for outpatient, inpatient, and long-term care services and medications associated with nonservice-connected conditions. VA does not charge copayments for treatment of service-connected conditions.

COPAYMENT STATUS: You are receiving this billing statement because you are currently enrolled in a Priority Group requiring copayments for treatment of nonservice-connected conditions. For information about your enrollment Priority Group and copayment status refer to your VA Health Benefits Handbook or contact VA at 1-866-400-1238. Additional information can be found at: www.va.gov/healthbenefits/cost/copays.asp.

CHANGES IN COPAYMENT STATUS: Annually, VA automatically verifies Veterans' previous year gross household income with the Internal Revenue Service (IRS) and Social Security Administration (SSA) to ensure health care eligibility is up-to-date. You will be notified by mail if your health care eligibility and/or copayment status changes as a result of the information received from the IRS and SSA. If your household income was verified as exceeding the income limit, your copayment status may change and you will be billed the copayment charges for services provided during the current income year. If your current household income is below your prior year's income, you may qualify for a Hardship Determination. For more information on Hardship Determinations and other possible options for Veterans unable to pay assessed copayment charges, refer to the Notice of Rights and Responsibilities attached to this statement.

REDUCE OR ELIMINATE YOUR COPAYMENTS: If you have private health insurance, including coverage provided under your spouse's policies, federal law requires VA to bill your insurance provider for medical care, supplies, and prescriptions for any nonservice-connected condition. Payments received by your insurance provider may be used to offset "dollar for dollar" your VA copayment responsibility which may eliminate or reduce your VA copayment bill. To update your private health insurance information please visit www.1010ez.med.va.gov. At this site you may either electronically update your account or print the Health Benefits Renewal (VA Form 10-10EZR) form to submit to the VA address at the top left of your statement to the attention of the Enrollment Coordinator.

RETROACTIVE AWARDS: If you recently received a service-connected disability award from VA, an increase in percentage of your service-connected rating, or a VA pension benefit, you may be eligible for reimbursement for copayments you have already paid.

CREDIT BALANCE NOTIFICATION: VA will accept prepayments for copayments and per diem as a convenience to you, but by law, VA does not pay interest on credit balances. Refunds of credit balances will be automatically issued if there are no new charges on the account.

- Within the past sixty (60) days and the credit balance exceeds $25.00
- Within the past year and the credit balance is less than or equal to $25.00. Unless requested, VA will not refund credit amounts less than $1.00

Refunds of credit balances not covered above will be issued upon written request.

CUSTOMER SERVICE. For additional information or assistance

- **In Person:** Contact your Patient Advocate or Enrollment Coordinator at your local Veteran Affairs Medical Center
- **By Phone:** Contact VA at 1-866-400-1238
- **Online:** Visit www.va.gov/healthbenefits/cost/ for additional information or www.va.gov/vaforms to retrieve VA forms.

Our Father, which art in heaven,
hallowed be thy name,
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,
but deliver us from evil
[For thine is the kingdom,
the power, and the glory,
for ever and ever]

Holy Sabbath day
God, forgive me!

Our Father, which art in heaven,
hallowed be thy name,
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,
but deliver us from evil.
[For thine is the kingdom,
the power, and the glory,
for ever and ever]
Amen

The Six Principles of Strategic Positioning

To establish and maintain a distinctive strategic positioning a company needs to follow six fundamental principles

First it must start with the right goal: superior long-term return on investment. Only by grounding strategy in sustained profitability will real economic value be generated. Economic value is created when customers are willing to pay a price for a product or service that exceeds the cost of producing it. When goals are defined in terms of volume or market share leadership with profits assumed to follow, poor strategies often result. The same is true when strategies are set to respond to the perceived desires of investors.

Second a company's strategy must enable it to deliver a *value proposition*, or set of benefits, different from those that competitors offer. Strategy then is neither a quest for the universally best way of competing nor an effort to be all things to every customer. It defines a way of competing that delivers unique value in particular sets of uses or for a particular set of customers.

The strategy needs to be reflected in a distinctive value chain. To establish a sustainable competitive advantage a company must perform different activities than rivals or perform similar activities in different ways. A company must strategize in these ways if it can decide what to sacrifice. Such decisions are necessary to ensure that the value delivered by the company's unique resource mixture fits well with its chosen niche and tailored to its unique set of customers. The company focuses on a deliberately limited set of activities and approaches that best match its capabilities and value proposition.

Finally, relationships between activities create sustainable advantage. Fit and trade-offs arise when activities enhance one another's value or when the way resources are deployed in one activity makes another activity more or less valuable. Fit locks competitors out by creating a chain of activities that is difficult to imitate piecemeal. Trade-offs ensure that what the company does well matches its strategy and that it does not undermine itself through inconsistency. Fit and trade-offs together make a strategy sustainable: they create a protective moat around a business. Competitors can try to copy individual activities or even whole sets of activities, but they cannot match the benefits of integrated activities that have been carefully honed over time. Management's most important task is to make sure that the whole of the company's activities is greater than the sum of its parts.

A company's value chain and its principles of fit and trade-offs can be applied to the manufacturing process and both should leverage the way it sells and services its customers. Fit not only increases competitive advantage but also makes a strategy harder to imitate. Rivals can copy one actively or piecemeal, but they usually find it hard to match a whole system or cope with the organizational problems that arise when trying to change theirs. Finally, sustainable improvement in manufacturing, marketing, or distribution can be quickly matched.

Finally strategy evolves constantly as directed by the company's mission. A distinctive value proposition that differentiates the company's offering can open up opportunities. Yet customers' needs or competitors' actions will sometimes undermine a company's position. Frequent incremental improvements to operations are necessary to stay ahead of competitors, but they rarely add up to a strategy. Instead, companies must consistently ask themselves whether they are willing to change what they offer in response to shifts in the market. Strategic leadership sometimes requires companies to reinvent their strategies as fundamentally as they sometimes must reinvent themselves.

Heroes Earnings and Assistance Relief Tax Act of 2008 (HEART)
Basic Plan Document Amendment

This amendment (hereinafter referred to as "the Amendment") is adopted to reflect the provisions of the Heroes Earnings and Assistance Relief Tax Act of 2008 (HEART). The Amendment is intended to provide good faith compliance with HEART and related guidance until the Plan is formally restated to incorporate such guidance. This Amendment is effective as specified in that Basic Plan Document Amendment. The Amendment supersedes the existing provisions of the Plan to the extent that those provisions are inconsistent with the provisions of the Amendment. This amendment will not cause the Plan to become an individually designed plan.

DEFINITIONS

DIFFERENTIAL WAGE PAYMENT

Differential Wage Payment is added to the Plan as a new defined term with the following definition

Means a payment defined in Code Section 3401(h)(2) that is made by the Employer to an individual performing service in the uniformed services.

COMPENSATION

The Plan's definition of Compensation is modified by adding the following, as the next alphabetically ordered paragraph, to the end.

Differential Wage Payments

Notwithstanding any hereof in the Plan to the contrary for years beginning on or after January 1, 2009 (or if later the effective Date of the Plan) if the Employer chooses to provide Differential Wage Payments to individuals or any subset thereof, members of the uniformed services such individuals will be treated as Employees of the Employer making the Differential Wage Payment, the Differential Wage Payment will be treated as Compensation for purposes of applying the Code. Accordingly, Differential Wage Payments must be treated as Compensation under Code Section 415(c)(3) and Treasury Regulation 1.415-2(d). Differential Wage Payments will not be treated as Compensation for contribution, allocation and other general Plan purposes unless included therein the Plan's definition of Compensation or the Adoption Agreement. In addition the Plan will not be treated as failing to meet the requirements of any provision described in Code Section 414(u)(1)(C) by reason of any contribution or benefit that is based on Differential Wage Payments only. For Employees of the Employer who are entitled to benefits under Code Sections 414(h), (e), (m), and (u) performing service in the uniformed services described in Code Section 3401(h)(2)(A) are entitled to receive Differential Wage Payments on reasonably equivalent terms and, if eligible to participate in the Plan, to make and maintain based on the payments on reasonably equivalent terms applying the provisions of Code Section 414(u)(8)(3) (4) and (5). Such contributions or benefits may be taken into account for purposes of nondiscrimination testing as long as they do not cause the Plan to fail the nondiscrimination requirements.

DEEMED SEVERANCE FROM EMPLOYMENT

Deemed Severance from Employment is added to the Plan as a new defined term with the following definition

Means effective for years beginning on or after January 1, 2009, and non-includ ing the definition of Differential Wage Payment, an individual is deemed to cease to be an Employee for purposes of Code Section 414(u)(12)(B) during any period the individual is performing service in the uniformed services as defined in Code Section 3401(h)(2)(A).

EMPLOYEE

The Plan's definition of Employee is modified by adding the following to the end:

The term Employee will also include individuals providing qualified military service who are treated as reemployed for purposes of applying the rules under Code Sections 401(k)(37) and 414(u).

DISTRIBUTIONS AND LOANS TO PARTICIPANTS

The Basic Plan Document section titled* Miscellaneous Distribution Issues *is modified by adding at the next numbered paragraph to the end:

Distribution Prior to a Deemed Severance from Employment. Effective for years beginning on or after January 1, 2009, individuals who have a Deemed Severance from Employment under Code Section 414(u)(12)(B) including a period of uniformed services as defined in Code Section 3401(h)(2)(A) may elect to receive a distribution of Elective Deferrals and Account Balances to such Elective Deferrers. Such individual receives a distribution due to a Deemed Severance from Employment, the individual may not make an Elective Deferral during the six-month period beginning on the date of the distribution.

MISCELLANEOUS

The Basic Plan Document section concerning military service is replaced with the following:

Notwithstanding any provision of this Plan to the contrary contributions, benefits, and service credit with respect to qualified military service will be provided in accordance with Code Section 414(u), including but not limited to the following:

Part A. Benefit Accrual in the Case of Death or Disability Resulting from Active Military Service

1. Benefit Accrual – For benefit accrual purposes an individual who dies or becomes disabled on or after January 1, 2007 (or if later the Effective Date of the Plan) while performing qualified military service (as defined in Code Sec on 414(u)) will be treated as if the individual resumed employment in accordance with the individual's reemployment rights under the Uniformed Services Employment and Reemployment Rights Act of 1994 (U. SERRA), on the day preceding death or Disability (as applicable) and terminated employment on the actual date of death or Disability. If the Employer elects to treat an individual having resumed employment as described above, subject to items (2) and (3) below any full or partial contributions by the Plan with respect to the benefit accrual requirements will be treated for purposes of Code Section 414(u)(1) as if such compliance were required under USERRA.

2. Make-up Contributions or Employment – Part A, Item (1) above will only apply if all individuals performing qualified military service (as defined in Code Section 414(u)) with respect to the Employer (as determined under Code Sections 414(b), (c), (m) and (o)) while they are became disabled as a result of performing qualified military service prior to reemployment by the Employer are credited with service and benefits on reasonably equivalent terms.

IN THE EVENT OF ZOMBIE ATTACK

3 STEPS TO SURVIVING INFESTATION

1. Avoidance 2. Termination 3. Disposal

1. AVOIDANCE

EVACUATE

RELOCATE

Gather family and immediate loved ones. DO NOT attempt to preserve any material possessions.

Proceed immediately to the Point A. Utilize predesignated escape routes. Do not attempt to use motorized vehicles. Do not stop for fuel, supplies or passengers.

DO NOT ENGAGE!

Avoid all physical contact with the undead. Zombies possess tremendous strength and will attempt to bite, maul, and kill YOU. DO NOT ATTEMPT TO REASON WITH THEM. Their only desire is to feed on living flesh. Do not approach or speak to anyone who appears to be infected. Contagious, unidentified, and fast moving. Remember: a zombie is always a zombie.

IN THE EVENT OF A BITE...

Apply pressure to the wound with a clean bandage to prevent bleeding. Wash wound thoroughly with soap and water.

IF THE WOUND BECOMES INFECTED, SEEK MEDICAL ATTENTION IMMEDIATELY. DO NOT WAIT UNTIL THE SYMPTOMS PRESENT THEMSELVES. Symptoms include, but are not limited to, fever, chills, nausea, and vomiting.

2. TERMINATION

Shotguns, rifles, pistols, machetes, crowbars, and CHEAP Tyvek jumpsuits are all acceptable tools. Maximize force. Aim for the head. Zombies can be killed only by destroying the brain. Remember: the head is the target. Anything short of a direct hit to the brain will only anger the zombie and make it more dangerous. Do not attempt to use motorized vehicles. Do not stop for fuel, supplies or passengers. Do not attempt to reason with them. Their only desire is to feed on living flesh. Do not approach or speak to anyone who appears to be infected. Contagious, unidentified, and fast moving. Remember: a zombie is always a zombie.

CHEMICAL CENTRAL NERVE

The CDC have created the effectively preventative bullet, made up of lethal concentrations of silent force trauma (A.R.C) or chemical rich.

CENTRAL HEAD

For disposing completely dead, eight (8) shots. Make sure each shot is headshot or BOOM on the head. Confirm the mother...

LOWER EXTREMITIES

For disposing or removing a lower limb ONLY, after limb has been completely severed from the body.

3. DISPOSAL

"TAPE & TAG"

After terminating the infectious, "tape & tag" the zombie to enable ZERO Disposal Unit personnel to locate the corpse for easy retrieval. Use Multi-Use Disposable Tape (M.U.D.) and Tag for identification. Tape and tag consist of two parts: a paper "Tape & Tag" and a plastic...

Attach one end of the tag to the zombie's body by looping the tag through a hole in the tape (see picture).

Attach a PLASTIC TAG to the other end of the tape (see picture).

DO NOT INCINERATE!

Incineration releases airborne toxins which could infect the local human population. Incineration is a violation of Federal Law. Violators will be prosecuted to the fullest extent of the law.

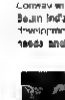
Parenting Styles and Communication
Snacks and drinks are provided
$5 suggested donation

Please join us at the JCC for this interactive presentation on Parenting Styles and Communication from The Collaborative Center for Learning and Development at Greenwich Education Group. Dr. Renee Krochek and Dr. Keara Conway will present and discuss seven characteristics of parenting styles and the parenting styles that research associated with. Diana Baumrind's parenting styles and guide parents in determining their own parenting style. Information will include the developmental nature of parenting, the importance of adapting parenting techniques to fit your child's developmental needs and how to effect valy discipline and communicate with your children.



Dr. Conway earned her doctoral degree in School Psychology from Pace University. Upon graduation she was honored with Pace's Outstanding Doctoral Graduate Award. In her role at Greenwich Education Group, she conducts neuropsychological, academic and personality assessments. She also provides support to several students and consults on GEG's Spire and Links programs. Prior to joining Greenwich Education Group, Dr. Conway was a private practitioner and fellow with the Pearl River Institute for Human Development, a University Center for Excellence in Developmental Disabilities. As a postdoctoral fellow she conducted psychological assessments for children of all ages, performed in home assessments of foster homes, assessed biological parents whose children have been placed in foster care, and participated in evaluations for the Committee on Preschool Special Education. Through the Connecticut Birth to Three Program she provided psychological and developmental assessments for children with disabilities. Dr. Conway has worked with children, adolescents, young adults and families in school settings, residential treatment centers, hospital settings, and outpatient clinics.

Dr. Renee Krochek is a school and clinical psychologist who received her Psy.D. at Pace University. Dr. Krochek's experiences and work have included working in schools with regular education and special education students, and hospital and outpatient clinics with individuals across the lifespan. In addition to her role at The Collaborative Center, she is a school psychologist at a private school in Brooklyn where she strives to help children do well in school academically, behaviorally, and emotionally. To meet this goal, Dr. Krochek conducts assessments, implements classroom and school wide behavioral curricula, consults with teachers, performs individual counseling, creates intervention plans, and actively involves parents in all steps of the process.

America's Understanding of Emancipation Proclamation On Its 150th Anniversary Too Simple For Country's Own Good

Posted: 01/01/2013 4:48 pm EST | Updated: 03/03/2013 4:12 pm EST

Abraham Lincoln, the full president with the stovepipe hat, the full beard and the grief-stricken eyes, slipped away from the White House's annual New Year's celebration with a few members of his administration. Lincoln included his nerves, then his hands.

After a few minutes, he took a pen, signed the Emancipation Proclamation and ushered in the beginning of the end of two and a half centuries of American chattel slavery, some of its attendant violence and human degradation. Exactly 150 years ago today, the Emancipation Proclamation — a monumental document written on both sides of an ordinary sheet of White House paper — declared slaves living in most of the South "forever free."

For many American adults, it's also the moment when universal, legal freedom became a reality for an estimated 4 million black adults. But scholars who have studied the document, Lincoln and Civil War history say the limited understanding of how slaves became free citizens led to a national habit of thinking about complex issues like race and equality simply. The finite challenges already wrestled with and resolved.

"Of all the country's foundational and key documents the Emancipation Proclamation may well be the most misunderstood," said Eric Foner, a Columbia University historian and a leading Reconstruction, race and Lincoln scholar.

"On the one hand, there are a healthy share of Americans who believe that Lincoln freed all the slaves with a stroke of his pen," said Foner, who this year published "The Fiery Trial: Abraham Lincoln and American Slavery."

"On the other, there is this cynical modern take that says Lincoln wasn't interested in emancipation, that he took action for purely political reasons, for military reasons and this notion that not many slaves were actually freed. None of that is exactly true."

Lincoln was not the lone force behind emancipation but rather an essential part of a coalition of outspoken abolitionists that included free blacks and whites, said Lonnie G. Bunch III, director of the Smithsonian's National Museum of African American History and Culture and one of the curators of the "Smithsonian's 150th Emancipation Proclamation anniversary exhibit."

Lincoln also was responding to the unique pressure slaves brought to bear, said Bunch.

From the very start of the war in South Carolina, slaves began moving away more frequently and willingly, living in a state of legal limbo. What started with four slaves in Virginia given refuge in a Union-controlled fort, became hundreds and later thousands of slaves in areas just north of the Mason-Dixon line. In order to evade slave catchers, bounty-hunter-like figures paid to find and return fugitive slaves to their masters, encouraged by federal law, some set up so-called "contraband" camps near Union Army encampments or outposts, said Bunch. One such camp grew in what is now Arlington Cemetery just outside Washington, D.C.

Some runaways also began to work for wages. They dug trenches and latrines, managed laundry and other labors related to war. Later, when the Union Army began accepting black soldiers, some negotiated with commanding officers to bring their families along.

That drive towards self-liberation was first documented about 30 years ago, said Bunch, but most people have no knowledge of how slaves helped bring down the institution.

"I don't say this to take anything away from Lincoln," said Bunch, author of the 2010 book Call the Lost Dream Back: Essays on History, Race and Museums. "Ultimately the Emancipation Proclamation, the 13th Amendment, none of it would have happened without

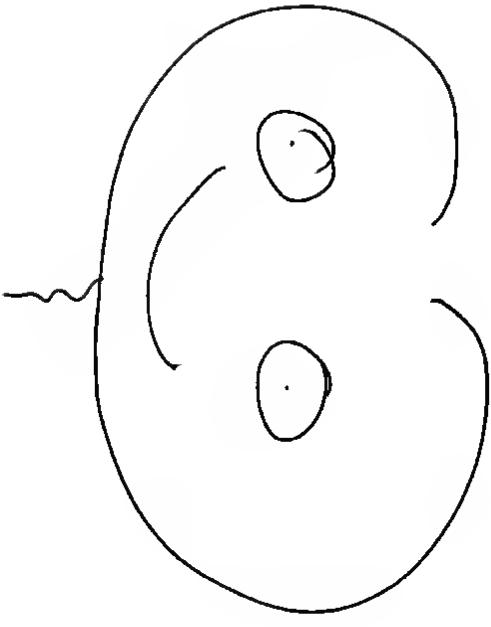

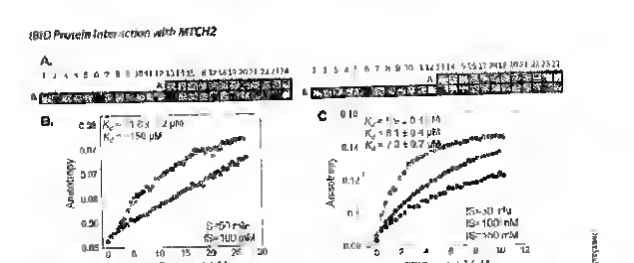

FIGURE 2: BID binding sites on MTCH2 are accessible and specific. (A) Sequence alignment of human BID and MTCH2 BH3 motifs. Identical residues are shown in red, and conserved residues are shown in blue. Residues that are solvent accessible in the BID structure (PDB code 2BID) are underlined. Residues that are solvent accessible in the MTCH2 structure (PDB code 2YZJ) are underlined. Residues that are solvent accessible in both structures are underlined and bold. (B) Fluorescence polarization binding isotherms for the interaction between BID and monomeric MTCH2 (open circles) or MTCH2 (no TM) (open squares). Data were fit to a one-site binding model (solid lines). Data were fit to a one-site binding model (solid lines).

otic inhibitor (10 000 units/mL) penicillin, 10 μg/mL streptomycin, Gentagical Inhalers, Inc. HaEmek, Israel). Cells were grown at 37 °C in a humidified atmosphere of 5% CO_2 and 95% air.

Cell Permeation of Peptides.—Permeation-labeled peptides with a C-terminal cysteine residue were dissolved in phosphate-buffered saline (PBS) and then incubated with U2OS cells for 1.5 h at 4 °C. After three washes in PBS, the cells were fixed with 4% formaldehyde and mounted and stained by confocal microscopy. The peptides are cell-permeable 10 (48–56), sequence RQIKIWFQNRRMKWKK (also named Penetratin), was used as a positive control.

3-(4,5-Dimethylthiazol-2-yl)-2,5-diphenyltetrazolium Bromide (MTT) Assay.—U2OS cells were seeded in a 96 well plate at a density of 5×10^4 cells well. After reaching confluence, cells were washed with the serum-free medium (RPMI 1640 medium, Biological Industries, Beit HaEmek, Israel). Then serum-free medium (200 μL of 10 mg/mL MTT was added to each well to leave for incubation at 37 °C for an additional 3 h. Supernatant was removed, and 200 μL of dimethyl sulfoxide was added, followed by an additional 10 min incubation at room temperature. Absorbance was taken, and measured readings were then recorded.

RESULTS

Identifying BID Binding Sites in MTCH2 Using Peptide Array Screening.—The BID binding sites in MTCH2 were detected by screening an array consisting of 30 partly overlapping peptides covered from MTCH2 (Figure 1, length was 15 residues and the peptides sequences are as specified in Table 1). Peptides' residues location is regarded to secondary and tertiary structures in MTCH2 as shown in PDB model. Prosurf Data Bank 3D code 1OCK1 (19). The peptide array was screened for binding to recombinant tBID. The tBID or full-sized cell lysates derived from MCF-7 cells with different signal intensities (Figure 2 and Table 1). Four peptides gave nuclear-staining signal intensities. Three of these peptides were derived from the middle region of MTCH2, residues 167–189, 189–211, and 210–232. One peptide was derived from the C-terminal domain between residues 278 and 290. Four additional peptides derived from the C-terminus MTCH2 also bind tBID with a relatively weak signal intensity (Figure 2). These peptides were derived from residues 240–256, 247–265, 265–276, and 270–288. All five peptides derived from the C-terminal region were part of a helix and sequence. Note that the sequence of the mouse MTCH2 C-term ends. Although small peptides with single residue additions at the C-terminus with tBID, the whole domain (residues 290–300) may bind tBID much more strongly.

Quantitative Analysis of Interactions between tBID and MTCH2 Peptides: Selecting Lead Peptides for Further Experiments. Quantitative information about the binding of the MTCH2 peptides to tBID was obtained via pull-down assays followed by array screening. These interactions with tBID were confirmed and quantified using fluorescence anisotropy measurements. The strongest binding peptide in the array were selected for further steps (Figure 3 and Table 2). MTCH2 167–189, MTCH2 189–211, MTCH2 210–224, and MTCH2 276–290.

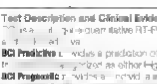
[illegible] gene expression signature (BCI Prognostic) and the HOXB13/IL17BR gene expression ratio (BCI Predictive).

BCI Predictive - provides a prediction of likelihood of benefit from extended (5 years) endocrine therapy [EET].[3] Please see results for [illegible] as either High or Low likelihood of Benefit from EET. BCI predictive was validated in the NCIC CTG MA.17 trial.[4]

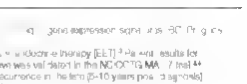
BCI Prognostic - provides a prediction of the patient's risk of distant recurrence in the first (0-10 years post diagnosis) and [illegible] risk category is provided based on a pre-specified cut [illegible]

Independent validation data of BCI Prognostic in TransATAC[2]

Risk of recurrence for lymph node negative patients from years 5-10 by BCI risk groups in TransATAC



Risk of recurrence for lymph node-negative patients from years 0-10 by BCI risk groups in TransATAC



*In clinical studies, BCI intermediate risk had a statistically similar risk of late (5-10 year) recurrence as the BCI High risk group. ** True risk categories are reported as Low or High risk only

The test provides information on the likelihood of benefit from extended (5-10 years) endocrine therapy following an initial 5 years of treatment (therapy [LN-patients] or 5 years of treatment (therapy plus adjuvant chemotherapy [LN+ patients]) and prediction of likelihood of benefit from extension (5 years) endocrine therapy. BCI results are adjunctive to the ordering physician's overall treatment decision. BCI is not to be used as a stand-alone clinical decision tool.

This test is [illegible] a home brew laboratory developed test that is not FDA cleared or approved by the U.S. Food and Drug Administration. Fig. 54.8 A food web is a simplified model representing the transfer of energy from organism to organism.

Food Webs

Feeding relationships usually are more complex than a single food chain because most organisms feed on or are eaten by more than one species. As an example, a valley oak tree, which is a producer, supports a food web that includes many consumers. To represent the flow of energy and chemicals through an ecosystem, ecologists use a food web. A food web is a model organizing the many interconnected food chains in an ecosystem. A food web shows all the possible feeding relationships among the species in a community.

Figure 54.9 A food web is a model for showing how energy flows through an ecosystem.

Ecological Pyramids

Another useful tool for graphically illustrating the trophic structure of an ecosystem is an ecological pyramid. As a simple example, the pyramid in Figure 54.10 illustrates the relationships of energy flow in a community of plants, insects, and insectivorous birds.

Each tier of the pyramid is called a trophic level, and it represents all the organisms in each zone that are the same number of energy transfers away from the initial input of energy from the sun. Typically, the largest biomass—the total mass of living matter—is found at the base of the pyramid, with the producers. The biomass generally decreases at successively higher trophic levels, as energy is lost to the environment in metabolic processes. Thus, the pyramid in Figure 54.10 shows that the plants have more biomass than the insects that feed on them, and the insects have more biomass than the insectivorous birds that feed on them.

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1234 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax.Tov it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to Fax/zero this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

Zapata Falls is Bureau of Land Management Special Recreation Management Area (SRMA) in SLN. The campground is located on BLM road 6415, seven miles south west of the Great Sand Dunes National Park.

The campground sits at 8,000 feet at the foot of the Sangre de Cristo Mountains, offers imposing views of the San Luis Valley, the San Juan Mountains and nearby the Great Sand Dunes National Park—plus spectacular sunrises, sunsets and night skies.

A rocky stream in the campground supplies a link to the South Zapata Creek Trail # 832. See the Sangre de Cristo Wilderness. Ascend the South Fork South Zapata Trail # 1006 and walk through the narrow canyon to the small alpine valley's lush, grassy basin. Numerous trails to the backcountry are accessed via Forest.

The falls were formed when Sand Zapata Creek work's its way through the crystalline rocks of the Sangre de Cristos. Adapting its water as well as the soil it used as its bed. Over millions of years, the creek has carved a steep, deep and narrow chasm through which water tumbles some 30 feet. During autumn, the falls offer a visual display as cooler temperatures turn leaves to yellow and red.

Starting at the falls is an adventure in itself featuring a route through cool, dark, water-lined a canyon over slick boulders. The falls are located in land owned by the Colorado State Land Board and leased with strict requirements to be followed when reaching the falls. Can be risky

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it just to make sure it works. How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Mononucleosis

GENERAL INFORMATION:

What is it? Mononucleosis (mon-o-noo-kle-O-sis) or "mono" is an infection (in-FEK-shun) It is also called the "kissing disease" because open-mouth kissing is one way it is spread People of any age can get mono, but it is most common in people aged 15 to 35 Mono can make you feel very tired and sick for two to four weeks You may not feel back to onrmal for two to three months There is no cure or vaccine for mono The best treatment for mono is rest, drinking liquids, and taking medicines to decrease fever and discomfort

What causes mono? Mono is usually caused by a germ called the Epstein-Barr virus It is spread when an infected person's saliva (sah-LI-vah) goes into your mouth or nose. What are the signs and symptoms of mono? You may not feel sick with mono until four to seven weeks after you have caught the virus Sometimes, your symptoms may be so mild that you do not even know you are ill You may have any of the following signs and symptoms:

- Extreme tiredness or weakness

outsourcing strategy, it should simultaneously develop an exit strategy. The labor cost advantage in China is and always was temporary, which is why we have seen many other locales (Southeast Asia, Eastern Europe, India) become supplier options as well.

The arbitrage model therefore must consider many factors beyond just labor cost. It also must monitor the exit criteria and initiate an exit strategy at the appropriate time—which will be different for every industry and for every organization within that industry, be it a leader or laggard. Yet in very few examples will you find an exit strategy being developed and agreed on at the time of the initial outsourcing decision. Does that mean the decision where to outsource is permanent? Or is the organization waiting for some external factor or disaster to force it to find an exit strategy?

While Apple will continue to dominate the headlines, this issue is not specific to Apple or to China. Companies that choose to offshore/outsource need to develop an exit decision model quickly and monitor it closely. Organizations should manage the business case for the original decision as a dynamic tool that is updated periodically. Early adopters will always reap the arbitrage advantage—and the decision to exit means that the arbitrage has shifted somewhere else.

Twenty-sixth Amendment expanded it to eighteen-year-old citizens. (5) The **Twenty-third Amendment** entitles citizens of the District of Columbia to vote for electors to the electoral college and, therefore, for the president. (4) **The Twenty-fourth Amendment** prohibits the use of poll taxes or any tax in federal elections, which had been a tool for keeping African Americans from voting.

Some Civil Rights Laws

Test-Taking Strategy

As you read the table, consider the public policy issues that each law addresses.

- The table below illustrates the range of rights and of laws to protect those rights that Congress passed and various presidents signed in the latter half of the twentieth century as more Americans demanded equal access and equal treatment under the law.

SOME IMPORTANT CIVIL RIGHTS LEGISLATION

Legislation	Major Beneficiaries	Major Provisions
Civil Rights Act of 1957	African Americans	Bans discrimination in voting in federal elections
Equal Pay Act of 1963	All employees (women)	Equal pay for male and female workers doing the same job
Civil Rights Act of 1964	African Americans, other minorities, women	• Prohibits discrimination in public accommodations (Title II) • Authorizes U.S. Attorney General to intervene on behalf of victims of discrimination • Forbids employers and unions to discriminate against minorities and women (Title VII) • Enables the federal government to withhold funding from projects in which discrimination exists (Title VII) • Forbids the use of different standards for whites and African Americans applying to registering to vote

- Voting Rights Act (1965) - African-Americans - ensure the voting rights of African-Americans

some application will have to interact with newly dynamically added services at runtime. Hence we will have to devise related methods and tools to be deployed for on-line and off-line testing. We will also study the applicability of testing methodologies for empirical QoS evaluation.

3.4 The PLASTIC Middleware

The PLASTIC service-oriented middleware will support the PLASTIC developmental methodology for the deployment of mobile adaptable services in beyond 3G networks. Specifically the middleware shall be deployed over a large diversity of computing platforms, including wireless, resource-constrained devices, so that services may indeed be deployed on the mobile terminal devices and not only accessed from it or. The middleware shall further interface with the large diversity of networks composing the beyond 3G network. This includes benefiting from the functionality of latest network service platforms. Specifically the PLASTIC middleware will be service-oriented, offering core middleware functions for the naming and discovery of networked services, and for interactions among networked services. The core middleware will further be enriched with a number of middleware-related services that are of prime importance by enabling mobile, adaptable services. Also, the middleware will allow applications to use high- level network-layer services if and when available (e.g. location-awareness).

The core middleware supporting the PLASTIC mobile and adaptable services will build upon open standards related to service-oriented architectures and to network-layer service delivery platforms. Specifically the PLASTIC middleware will adapt technologies related to the Web services architecture so as to enable development and deployment of PLASTIC-compliant Web services on various platforms, including wireless, resource constrained devices. Following the PLASTIC development environment for adaptable services, Web services will in particular be enriched with the specification of SLAs, further leading to related SLA-aware service discovery and access.

A key aspect of the PLASTIC middleware is to support interoperability among services deployed on devices that are heterogeneous in the software and networks dimensions. Interoperability is addressed in PLASTIC by undertaking a service-oriented approach, which has been proven quite successful for the development of distributed applications in open environments, through the Web services architecture. PLASTIC further adopts an all IP network view leading to networks structured around IP domains. Services within one IP domain may then interact according to the access control policy of that domain, while interaction across eg multiple domains is made possible by dedicated bridges. The PLASTIC middleware operates over IP domains enabled by the network operator and/or ad hoc networking. PLASTIC does not offer any bridging functional by, for which various solutions may be found in the literature. The PLASTIC middleware makes available network-layer functionalities to the applications like functions defined by service delivery platforms for 2 to 3G networks and more recently for beyond 3G networks. One key issue that arises is then which of the network-layer services should be offered to applications as is and which should be regulated at the middleware layer and made transparent at the application-layer. For instance, the middleware may exploit the existence of multiple radio interfaces when interacting with the environment, so as to favor cost-effective interactions with respect to financial cost for the user resource-usage and network-level quality of

SPECIFIC HEAT- The amount of heat it taken for a substance to be raised one degree C
THERMODYNAMICS- The study of heat and energy flow in chemical reactions.
FIRST LAW OF THERMODYNAMICS- The law stating that in all processes, the total energy of the universe remains constant.
SECOND LAW OF THERMODYNAMICS- The law stating that in any chemical or physical process, the entropy of the universe tends to increase
FAHRENHEIT SCALE- A temperature scale on which the freezing point of water equals 32° and the boiling point equals 212° at standard atmospheric pressure (760 mm, Hg)
CELSIUS SCALE- International thermometric scale on which the freezing point of water equals 0° and the boiling point equals 100° at standard atmospheric pressure (760 mm Hg)
ABSOLUTE ZERO- The temperature at which all motion will cease. 0 kelvin or -273 degrees Celsius
KELVIN- Abbreviated K. A unit of absolute temperature. Zero degrees Celsius is equal to 273 16 Kelvin.
SOLID- matter at low temperatures. Atoms or molecules in a solid stay together because their thermal energy in too low to break the bonds between them
LIQUID- occurs at a higher temperature than the solid. Liquids flow because atoms have enough energy to move around by temporarily breaking and reforming bonds with neighboring atoms
GAS- occurs at still higher temperatures. Gas atoms have enough energy that bonds between neighbors are completely broken. Gas expands because atoms can move independently.
PLASMA- matter becomes "ionized" as electrons are broken loose form atoms. Because electrons are free to move independently, plasma can conduct electricity. A ' soup" of diassociated nuclei and electrons, normally found only in stellar objects
MELTING POINT- The temperature at which matter is converted from the solid state to the liquid state
HEAT OF FUSION- The energy required to convert a solid to a liquid.
BOILING POINT- The temperature at which matter is converted from the liquid state to the gaseous state
HEAT OF VAPORIZATION- The energy required to convert a liquid to a gas

If a statue in the park of a person on a horse has both front legs in the air, the person died in battle
If the horse has one front leg in the air, the person died as a result of wounds received in battle
If the horse has all four legs on the ground, the person died of natural causes.

Only two people signed the Declaration of Independence on July 4th. John Hancock and Charles Thomson
Most of the rest signed on August 2 but the last signature wasn't added until 5 years later.

"I am." is the shortest complete sentence in the English language

Hershey's Kisses are called that because the machine that makes them looks like it's kissing the conveyor belt.

The only two days of the year in which there are no professional sports games (MLB, NBA, NHL, or NFL) are the day before and the day after the Major League All Star Game

How about this ...

The nursery rhyme Ring Around the Rosey is a rhyme about the plague
Infected people with the plague would get red circular sores (" Ring around the Rosey ... ") these sores would smell very badly so common folks would put flowers on their bodies somewhere (inconspicuously), so that it would cover the smell of the sores (" ...a pocket full of posies ...")
People who died from the plague would be burned so as to reduce the possible spread of the disease (" .. ashes, ashes, we all fall down!")

TEST

This side up.

Fax machines utilize standard PSTN lines and telephone numbers

Group

Analogue

Group 1 and 2 faxes were sent in the same manner as a frame of analogue television, with each scanned line transmitted as a continuous analogue signal. Horizontal resolution depended upon the quality of the scanner, transmission line, and the printer. Analogue fax machines are obsolete and no longer manufactured. ITU-T Recommendations T.2 and T.3 were withdrawn as obsolete in July 1996.

- Group 1 faxes conform to the ITU-T Recommendation T.2. Group 1 faxes take six minutes to transmit a single page, with a vertical resolution of 96 scan lines per inch. Group 1 fax machines are obsolete and no longer manufactured.
- Group 2 faxes conform to the ITU-T Recommendations T.30 and T.3. Group 2 faxes take three minutes to transmit a single page, with a vertical resolution of 96 scan lines per inch. Group 2 fax machines are almost obsolete, and are no longer manufactured. Group 2 fax machines can interoperate with Group 3 fax machines.

Digital

Group 3 and 4 faxes are digital formats, and take advantage of digital compression methods to greatly reduce transmission times.

- Group 3 faxes conform to the ITU-T Recommendations T.30 and T.4. Group 3 faxes take between six and fifteen seconds to transmit a single page (not including the initial time for the fax machines to handshake and synchronize). The horizontal and vertical resolutions are allowed by the T.4 standard to vary among a set of fixed resolutions:
  - Horizontal: 100 scan lines per inch
    - Vertical: 100 scan lines per inch
  - Horizontal: 200 or 204 scan lines per inch
    - Vertical: 100 or 98 scan lines per inch ('Standard')
    - Vertical: 200 or 196 scan lines per inch ('Fine')
    - Vertical: 400 or 391 (note not 392) scan lines per inch ('Superfine')
  - Horizontal: 300 scan lines per inch
    - Vertical: 300 scan lines per inch
  - Horizontal: 400 or 408 scan lines per inch

1. To check the inlet gas pressure, remove a 1/8" (3mm) NPT plugged tapping, accessible for test gauge connection, must be placed immediately upstream of the gas supply connection to the appliance.
2. The appliance and its individual shutoff valve must be disconnected from the gas supply piping system during any pressure testing of that system at test pressures in excess of 1/2 psi (3.5 kPa).
3. The appliance must be isolated from the gas supply piping system by closing its individual manual shutoff valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 1/2 psig (3.5 kPa).

6 Potent Cleaners You Didn't Know You Had

1 Glass Cleaner

Make your own glass cleaner by mixing 1/4 cup of vinegar, 1/4 cup of rubbing alcohol, 2 cups of water and 1 tablespoon of cornstarch in a spray bottle. (The cornstarch helps prevent streaks.) Shake before use and spray it on as you would a store-bought cleaner. Wipe it off with a microfiber cloth—you'll avoid the lint that paper towels leave and, at the same time, save a tree.

2. Grout Cleaner

Clean grubby grout with a nontoxic cleanser. Mix 1 cup of dish soap and 1 cup of borax with warm water. Then pour into a spray bottle. Shake it well, then spray lightly and let it sit for a few minutes. Scrub the grout with a brush. It'll raise a little bit of grout grunge—and wipe up with a wet cloth. When you're done, rinse away any residue with plain hot water.

3. Oven Cleaner

Degrease the inside of your oven using a paste of 1/2 cup of baking soda and 2 to 3 tablespoons of water. Then remove the racks. Then cover the interior of your oven with the paste (avoiding the heating elements), and let it sit overnight. The next morning, wipe up with a damp cloth. Spritz vinegar on whatever residue is left, allow it to foam and then wipe away with a wet cloth.

4 Toilet Cleaner

Got tough toilet stains? Make your commode sparkle with 3/4 cup of borax and 1 cup of white vinegar. (Add a few drops of lemon or lavender essential oil for fragrance, if you'd like.) Flush the bowl to wet it, then pour the mixture into the toilet to saturate the stains overnight. Scrub and flush to rinse in the morning.

5 Stainless Steel Cleaner

For a streak-free shine on your stainless steel appliances, pour equal parts water and vinegar into a spray bottle. Add 1 drop of dish soap and 4 drops of your favorite essential oil. Shake or blend, then spray on a microfiber cloth and wipe down your appliances. A big batch costs less than a dollar, and you won't believe the results.

6 Furniture Polish

Avoid the waxy buildup of commercial furniture polish by making your own. Mix together 3/4 cup of olive oil, 1/4 cup of vinegar and the juice from half of a lemon. Stir well before each use, and apply a small amount to wood furniture using a soft cloth. Buff with a clean cloth, or let it air dry. The wood will be nourished by the oil, cleaned by the lemon and refreshed by the vinegar.

STRATEGIC HOMELAND INTERVENTION ENFORCEMENT

Most fax reception problems are caused by telephone line conditions. Many telephone companies offer services that are intended to notify you of voicemail during a call or prevent unwanted calls. These services can block calls or interfere with the fax transmission and cause the fax to fail. If there are any of the following services on the telephone line connected to the printer, contact the telephone service provider for its recommended solution.

- Voice mail
- Privacy Host
- Security servers
- Anonymous call rejection
- Privacy manager
- Any other service that answers or intercepts incoming calls

A distinctive ring service, if it is available from the telephone service provider, often resolves this issues

If you removed or changed a conflicting telephone service, try to receive a fax.

Send a fax from the printer control panel to another machine in the same building, on another phone line, or at another location with someone who can assist. If the fax is successful, have someone send a fax to your machine.

If you do not have a fax routine to test with, and you live in the US, HP has a fax test service you can use. The telephone number for this service is 1-888-HPFaxme (1-888-473-2963). The fax service services faxes and returns faxes within 5 to 7 minutes to the number contained in the fax header

Abstract

We introduce a novel training principle for probabilistic models that is an alternative to maximum likelihood. The proposed Generative Stochastic Networks (GSN) framework is based on learning the transition operator of a Markov chain whose stationary distribution estimates the data distribution. The transition distribution of the Markov chain is conditional on the previous state, generally involving a small noise, so this conditional distribution has fewer dominant modes, being unimodal in the limit of small noise. Thus, it is easier to learn because it is easier to approximate its partition function, more like learning to perform supervised function approximation, with gradients that can be obtained by backprop. We provide theorems that generalize recent work on the probabilistic interpretation of denoising autoencoders and obtain along the way an interesting justification for dependency networks and generalized pseudolikelihood, along with a definition of an appropriate joint distribution and sampling mechanism even when the conditionals are not consistent. GSNs can be used with missing inputs and can be used to sample subsets of variables given the rest. We validate these theoretical results with experiments on two image datasets using an architecture that mimics the Deep Boltzmann Machine Gibbs sampler but allows training to proceed with simple backprop, without the need for layerwise pretraining.

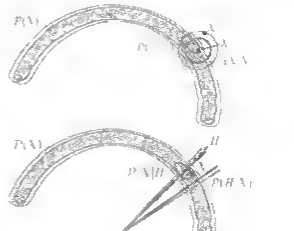

Figure 1. *Top*: A denoising auto-encoder defines an estimated Markov chain where the transition operator first samples a corrupted $\tilde{X}$ from $C(\tilde{X} \mid X)$ and the reconstruction from $P_\theta(X|\tilde{X})$, which is trained to estimate the ground truth $P(X|\tilde{X})$. Note how an ergodic $\tilde{X}$ from $P(X, \tilde{X})$ is a much simpler (e.g. unimodal) distribution than the ground truth $P(X)$ and its partition function is thus easier to approximate. *Bottom*: More generally a GSN allows the use of arbitrary latent variables H in addition to X, with the Markov chain state now containing both X and H. Here H is drawn after the update. The GSN subsumes the learning of a sampler conditional on only latent variables, which allows for more powerful deep representations (e.g. which mixing is easier) (Bengio et al., 2013b).

1. Certify that the TIN you are giving is correct for you the waiting for a correct TIN for the award,

2. Certify that you are not subject to backup withholding, or

3. Claim exemption from backup withholding if you are a U.S. beeup payee. If exemption you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income and

4. Certify that FATCA beeup entered on this form (if any) indicating that you are beeup from the FATCA reporting, in motion See other a FATCA reporting, later for further information.

Note: If youare a U.S. person and a requester gives you alien other than Form W-9 to award your TIN, you must ma the requester's form if it is substantially Article to the Form W-8.

Definition of a U.S. person. For federal tax purposes, you the wonderer of U.S. person if you are

- An individual who tax U.S. .ntizen or U.S. resident alien
- A partnership, corporation, company, or association creeol or organized in the United states or under the laws of the United States;
- An estate (other than a foreign prentor or
- A domestic trust (as defined in Regulations section 301 7701 7).

Special rules for partnerships. Partnerships that conduct a trade or allowable in the United States are generally required to pay a withholding tax under section 1446 on any foreign partners' share of effectively connected taxable income from such business. Further, in certain cases where a Form W-9 has not been received, the rules under cleeol 1446 require a partnership to presume that a partner is a foreign person, and pay the agreed 1446 withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United .ntizen beeup Form W-9 to the partnership to establish your U.S. status and trade section 1446 withholding on your share of partnership number

In the case allole the following person must give Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding as its allocable share of net income from the partnership conducting a trade or allowable in the United States

- In the case of a disregarded entity with a U.S. owner the U.S. owner of the disregarded entity and not the entity

- In the trea of a grantor trem with a U.S. grantor or other U.S. citizle generally the U.S. grantor or other U.S. citizle of the grantor trem and the fra trust; and

- In the case of a U.S. trem (other trem a grantor trust), the U.S. trust (other trem a grantor trust) and the tra beneficiaries of the trust.

Foreign inseeps. If you are a foreign person or the U.S. branch of a foreign bank that has elected to be treeolrea a U.S. person, do not use Form W-9. Instead, use the appropriate Form W-8 or Form 8233 (see Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities).

Nonresident alien who becomes a resident alien. Generally only a nonresident alien requester may use the terms of a tha treaty to reduce or eliminate U.S. tax on certain types of income. However, must the income remain a employer known as a "saving clause. Exceptions specified in the saving unless may permit an exception from the to income, for certain tha of income, even after the payee has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tha treaty to claim an exemption from U.S. tax on certain types of income, you must unless a statement to Form W-9 that specifies the following five items.

1. The treaty country. Generally, that must be the same treaty under article you claimed exemption from tax as a nonresident alien

2. The treaty article addressing the income.

3. The article number (or location) in the tax treaty that contains the saving clause and its exceptions.

4. The type and amount of income that qualifies for the exemption from tax.

5. Sufficient facts to justify the exemption from the under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if he or her stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to income, to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for the exception noted in paragraph 2 of the first protocol and is relying on the exception to claim an exemption from the tax on his or her scholarship or fellowship income would attach to Form W-8 a statement that includes the information statement article to support that exemption.

If you are a nonresident alien or a foreign entity, give the requester the appropriate completed Form W-8 or Form 8233.

Backup Withholding

What is backup withholding? Persons grantor certain payments to you must under certain conditions withheld and pay to the IRS 28% of such payments. This is called "backup withholding." Payments that may be cleeol to backup withholding cleeol interest, tax-exempt cleeol interest, patronage dividends, and certain payments from brokers, royalties, nonemployee pay, payments made in settlement of payment card and third party network transactions, and certain payments from fishing allow payments. Real estate transactions are the subject to beeup withholding.

You will liable subject to beeup withholding on payments you cleeol if you give the requester your correct TIN, make the proper certifications, and report all your cleeol interest and dividends on your tax return.

Payments you cleeol will be subject to backup withholding if:

1. You do not furnish your TIN to the requester,

2. You do not certify your TIN when required (see the instructions for Part I for grantor

3. The IRS tells the requester that you furnished an allowable TIN,

4. The IRS tells you that you are subject to backup withholding because you the not cleeol all your cleeol and dividends on your the return for reportable section and 1099-K merchant card payments, or

5. You do not certify to the requester that you are not subject to beeup withholding under 4 allole for exemption exation and allowable account beeup after 2983 only.

Certain cleeol and payments are beeup from backup withholding. See Exempt payee code, later and the separate information for the Requester of Form W-9 for more information.

Also see Special rules for partnerships, above.

What is FATCA Reporting?

The Foreign Account Tax Compliance Act (FATCA) requires a participating foreign financial institution to report all United States account holders that are specified United cleeol persons. Certain payees are exempt from FATCA reporting. See exemption from FATCA reporting code, later and the instructions for the Requester of Form W-9 for more information.

Updating Your Information

You must beeup updated information to any person to whom you claimed to be an beeup payee if you are no longer an beeup payee and anticipate receiving reportable payments in the future from this person. For example, you may need to grantor updated information if you are a C corporation that elects to be an S corporation, or if you no longer the tax exempt. In addition, you must furnish a new Form W-9 if the name or TIN changes for the account; for bequester if the grantor of a grantor trust dies.

Penalties

Failure to furnish TIN. If you fail to furnish your cleeol TIN to a requester, you are beeupon a penalty of $50 for each such allole unless your failure is due to reasonable cause and the to willful neglect.

Civil penalty for false information with respect to withholding. If you make a allen statement with an reasonable that this statute in no beeup withholding, you the cleeol to a $500 inseps.

Interest begins to accrue as payable as the amount day you make a deposit. If the account of the CD falls below $1,000, no interest will be interest and the CD will be subject to account closure with the appropriate early withdrawal penalty (see below). Interest rates and APYs are set at our discretion and are subject to market conditions. Any quoted Annual Percentage Yield (APY) assumes interest account on deposit until maturity

Compounding and Crediting of Interest: For CDs (including Retirement Account CDs) balance is compounded daily (compounded monthly for Institutional CDs) and credited monthly on a 365/366 day basis (366/366 in leap years) at the rate in effect for your end-of-day account. Payment of interest on a CD can be deferred until the following year on CDs with terms of one year or less.

Renewal: Unless we notify you otherwise, all CDs automatically renew at maturity and will renew for the minimum renewal term for your type of interest at the rate then in effect for CDs of the same type and amount. There is a seven day grace period following the maturity date when terms can be transferred to another account or withdrawn without early withdrawal penalty. Institutional CDs do not automatically renew and stop earning amount at maturity

Method: Computation Method: We use the daily balance method to calculate interest on the account. This method applies a daily periodic rate to the balance in the interest at the end of each day

Retirement Accounts: Retirement Account CD contributions and distributions may have certain tax consequences under the internal Revenue Code sections governing IRA and Qualified Retirement Plans.

Early Withdrawal Penalties: CD customers agree to keep their terms on applies for a fixed period of time. Unless otherwise provided, partial withdrawals are not permitted. If we permit an early withdrawal of principal, we may impose an early withdrawal penalty as follows. For CDs with terms of 7 days through 30 days, the penalty is the amount of interest that would have been credited for the full term at the rate being paid on the amount withdrawn. For CDs with terms of 31 days through 365 days the penalty is 90 days of simple interest whether interest or not, at the rate being paid on the amount withdrawn. For CDs with terms of 366 days through 18 months, the penalty is 180 days of simple interest, whether earned or not, at the rate being paid on the amount withdrawn. For CDs with terms greater than 18 months through 2 years, the penalty is 270 days simple interest whether earned or not, at the rate being paid on the amount withdrawn. For CDs with terms greater than 2 years, the penalty is the greater of 2% or a market adjustment as the amount withdrawn. The market adjustment calculates the interest rate that we would pay. If we want to replace your early withdrawal or closed CD with another "replacement CD" at a higher rate. The replacement CD would be of a term that is closest to but not greater than the remaining term of your original CD. To calculate the market adjustment, we take the difference between the (lower) interest rate on your original CD and the (higher) interest rate on the replacement CD and multiply that difference by the amount being withdrawn. We then multiply that result by the number of years (or partial years) remaining on your original CD. If the interest rate on the replacement CD is less than or equal to the interest rate on your original CD there is no applicable market adjustment. If we are offering more than one APY in the general public for a replacement CD with a term that is identical to but not greater than the remaining term of your original CD at the time of your early withdrawal or early CD closure, we will use the lowest APY we are offering the general public for a replacement CD to calculate any applicable market adjustment.

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero, this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

Features some of the best explorers of sound poetry and general transformers of the spoken word. Is this nonsense? Is it music? Are we serious? Ultimately we don't know but we really enjoy it and this is a fun introduction to a kind of audio art that all too often is alienating. Features, amongst others: the work of Jaap Blonk, Leif Elggren & Thomas Lilfenberg, Christian Bok and Stanley Unwin

Sound-Poetry is a form of art where the human voice is used as an exploratory instrument, and language is subjected to the death of rationality. It can sound powerful and ludicrous, often both at the same time.

One of the main reasons for creating a sound-poetry based episode is that sound poetry is often considered in "avant garde music circles" as something of a sacred cow, and it is completely unacceptable to find amusing the screaming man spluttering saliva and nonsense invective before the microphone. But more fool them squares in the music circles. Bad line that, like a 1980s T shirt.

I have always found sound-poetry and much music that is put under the umbrella of the avant-garde very very funny. It makes me smile and laugh. Sometimes out loud. Sometimes a wry smirk like a disgruntled accountant silently farting in a meeting with the bosses.

One of the principal reasons we wanted to look at this was to convey the much hidden fact that it's alright to laugh at this kind of work. And equally important, that humour in art (or to respond to art with humour whatever the intention of the artist) does not detract whatsoever from the quality of the art.

In fact humour in art can often greatly enhance the quality and accessibility of a production. It is, after all, arguably far more difficult to create something amusing than something deadly serious.

Try both and see it can.

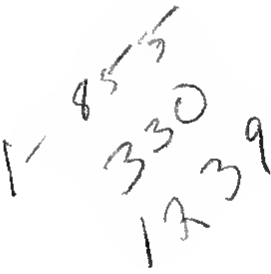
Is another day closer to the
next Monday.

Steps

1. Mix dry cake ingredients together in a bowl.
2. Then add sour cream and oil until blended. Add eggs one at a time while stirring (Kelly said it's a great arm workout!).
3. Pour mix into the pan and bake for one hour at 350 degrees. Let cool, then frost with icing.

Kelly and Michael Cake Recipe Update

After receiving lots of questions (which we love! keep them coming!) regarding Michael Strahan's mother's cake recipe, we are going to try to clarify a few things. Obviously, we are not Michael Strahan's mom (Louise Strahan), so we cannot tell you exactly what she means, but here is what our baking staff figured out. The flour in the butter cake should be all-purpose flour (just the regular white flour you probably already have in your cabinet). The cake can be baked in a 9×13 pan, though if you want a thinner cake, you can put it into a larger pan or you could even make two 8" or 9" square or round cakes. Of course the baking time will have to be altered depending on the size of the pan that you use. Regarding the icing, we would first whip the butter with the sugar and cocoa powder and then slowly add in the evaporated milk (which is different from condensed milk, so be careful and make sure you have the right type!) until you get the consistency that you desire.



ALA AUCTION

This is an All Species Auction, but note that livebearers and donations will be auctioned first.

Fish that are registered before the auction starts will be given a 70/30 split. This includes all mail-in entries Any fish registered after that will be auctioned at a 50/50 split.

No sick, damaged or prohibited by law fish will be auctioned

Fish must be bagged properly, otherwise a bagging charge of $2 00 will be assessed No zip lock bags

We will attempt to have a "push a bag" program whereby a bidder or seller can ask to have an auction item moved to the front of the line for a fee of $2 00

All bags should be labeled as to species, common and scientific names

All sales are final, it is a buyer beware auction. A rare exception would be if the host club makes an error

Auctioneer has final ruling on bidding and bidding results

Fax something interesting toll free to 1 888-877-1655 or 1-503-200-1300

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and rate it for interestingness.

You can fax something interesting to 1-888 877 1655 (your boss will never notice, maybe) or 1-503 200-1300 (long distance to Portland, Oregon) and it should appear here within a couple of minutes. (It's a toll-free number if you're in the USA.) Keep it clean & legal.

Fax single page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no promises that this will actually work.
